Charter School Consulting Services

The Right Prep provides services to charter schools at all levels: new schools, established schools, growing and shrinking schools. A school in the process of just getting off the ground will probably have concerns with the application process. An established school may want to “go green” as part of a new initiative. Either way, we can help! We can support you by providing assistance with: budgeting, student registration, staff policies and procedures, and much, much more.

In today’s world, schools are facing new challenges. For example, contracting and liability issues are increasingly prevalent in the world of education, and can be complex and potentially catastrophic. Let us show you how to prevent problems before they begin by having a legal/risk assessments done. The Right Prep will help your school design a portfolio to match what you need.

Community development is not a new issue, but it continues to be a challenge and a missed opportunity for many schools. Working with the local community can yield new assets, and new programs that can turn a struggling school into a flagship school. These types of opportunities are out there, but schools often properly utilize its resources to find them. The Right Prep will work for you to go out to the community and both find and develop these opportunities.

Whether it is dealing with people or paper, The Right Prep can help. The Right Prep specializes in building unique programs for schools to support them in every possible way. Schools and students affect us all, so it is up to us all to help make them both succeed!
